

Week of: 1/19 – 1/22

Teacher: Stewart

Subject: Biology

Monday	TLW:	Objective:
		Activities: No School-MLK Holiday
		Materials:
		Follow Up/HW:
Tuesday	TLW:	Objective: Identify and describe the role of bacteria in maintaining health such as in digestion and in causing diseases such as in Streptococcus infection and diphtheria. TEKS: 4D Compare the structure and function of viruses to cells and describe the role of viruses in causing diseases and conditions such as acquired immune deficiency syndrome, common colds, smallpox, influenza and warts. TEKS: 4C
		Activities: Bacteria/Virus Wanted Poster Project Due TODAY! Students will present information about their project and answer any questions other students may have about their project.
		Materials: Bacteria/Virus Poster Project
		Follow Up/HW: <i>Test on Bacteria/Viruses January 27th/28th</i>

Wednesday	TLW:	Objective: Identify and describe the role of bacteria in maintaining health such as in digestion and in causing diseases such as in Streptococcus infection and diphtheria. TEKS: 4D Compare the structure and function of viruses to cells and describe the role of viruses in causing diseases and conditions such as acquired immune deficiency syndrome, common colds, smallpox, influenza and warts. TEKS: 4C
	Activities:	Students will finish presentations on their Bacteria/Virus Projects.
		After all presentations are complete, students will work on a Bacteria/Virus handout to review the bacteria and virus unit.
	Materials:	Follow Up/HW: <i>Test on Bacteria/Viruses January 27th/28th</i>
Thursday	TLW:	Objective: Identify and describe the role of bacteria in maintaining health such as in digestion and in causing diseases such as in Streptococcus infection and diphtheria. TEKS: 4D Compare the structure and function of viruses to cells and describe the role of viruses in causing diseases and conditions such as acquired immune deficiency syndrome, common colds, smallpox, influenza and warts. TEKS: 4C
	Activities:	Same as Wednesday
	Materials:	
	Follow Up/HW:	<i>Test on Bacteria/Viruses January 27th/28th</i>
Friday	TLW:	Objective: Identify and describe the role of bacteria in maintaining health such as in digestion and in causing diseases such as in Streptococcus infection and diphtheria. TEKS: 4D Compare the structure and function of viruses to cells and describe the role of viruses in causing diseases and conditions such as acquired immune deficiency syndrome, common colds, smallpox, influenza and warts. TEKS: 4C
	Activities:	Students will go around the room to learn more about other students' projects. They will be responsible for answering 5 questions from each project they get information about. (Each student wrote 5 questions that they would like other students' to answer about their project and turned this in for a grade the day they turned in the project.) They will have a total of 10 projects to look at during the class period today.
		Students will be given a review sheet to begin preparing for a test next week.
	Materials:	Review Sheet
	Follow Up/HW:	<i>Test on Bacteria/Viruses January 27th/28th</i>
