

How to Make Old Style Horror Poster in Photoshop

Step 1 Create a new document in photoshop. For the sake of this tutorial, I will be using an 8.5 x 11 inch file at 72dpi.

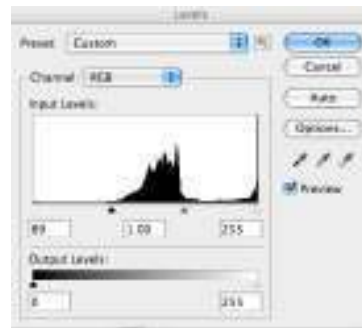

Step 2 The first thing I want to do is find an image for the main portion of the poster and start editing it. I am using the following image of my younger sister at 17

Step 3 Re-size the image so that there will be room for the header and footer text.

Step 4 In this step we are going to do several things so that the image has the overall look we adjust the images levels. we are going to add a slight surface blur to help filter will barely be noticeable. Radius 11 Threshold 27

We need to get rid of the color match the style of the poster. simple color overlay to the image layer>control click on Properties> Blending select color 8B2C07 Opacity

need for the poster. First we will Image>Adjustments>Levels Now achieve the vintage print feel. This Filters>Blur>Surface Filter

in this image so that it will To do this, we will add a image layer. Click on the the layer>select Layer Options>Color Overlay 31%

This is getting closer, but we still need to lose some color. Lets add a photo filter. Image>Adjustments>PhotoFilter Click on the color block and change the color to #8a5902 and

the Density to 87%

Lastly we will apply a Cross Hatch filter. Filters>Brush Strokes>Cross Hatch

Stroke Length: 4, Sharpness: 3, Strength: 1

Your image should now look like this:

Step 5 Now we will put the finishing touches on this image so we can start working on the rest of the poster.

We need to get rid of all the background to this picture. Rather than cut it out with the pen tool, I want to erase around it with a soft eraser. By doing this, you will get an ever so slight glow around the subject that will add a nice touch later on in this tutorial.

After you have erased the background, set the layer fill to 80%. You should have something that looks similar to this:

Step 6 Now we will add the background. Use the paper background from the shared folder. Create one layer of this image so that it covers the entire area of our canvas. Create a second layer of the same image with a small portion of the white border showing.

Step 8, Add a color overlay to it. Click on the image layer on the layer>select Blending Options>Color Overlay Change the color to #863838

Change the blend mode to Hue.

Step 9

The Planet Terror poster looks as though it has been folded up. So, we need to do the same. I will be using the image from the shared folder

Copy it. In the layers pane, re-size and rotate the image to fit. In the Layers pane, change the blend mode to Multiply.

QuickTime™ and a decompressor are needed to see this picture.

Step 10 Draw a black box near the bottom of the poster.

Step 11 Type the title of your movie on top of the black box, but under your folded paper layer. □Next, in the Layers pane, command click on the movie title layer and click Rasterize Type. With the Move Tool, click on your movie title so that the Transform Box Show up.□Hold Down the Control key and click on the bottom right corner of the Transform box.□By clicking and dragging, you can distort the text so that it has the angled effect that we see on the Planet Terror poster.□Repeat the above steps for the left side of the text as well.

QuickTime™ and a decompressor are needed to see this picture.

Step 12 Start adding the random text to your movie poster however you see fit. I will be using the Planet Terror for reference.

Step 13 To finish off the poster, we need to use some Photoshop Brushes to rough up the poster. Make sure that you create a new layer for every few brush strokes so that if you don't like some of them, you can delete the layer. Do not make brush strokes on any of the image layers. Create a new layer. Next; in the layers pane, Command click on the main red layer we created in step 7. This will mask your new layers so that your brush strokes will only show up on the poster.

QuickTime™ and a decompressor are needed to see this picture.

There is no easy way to explain how to do this, you just have to play with it.

Here is the finished result.
