

Digital Media - Week of Jan 4

JAN 4 In this web design assignment, I will show you how to create a layout for a web app's website using Photoshop. We will create all the popular components of a **web application website**, like a "featured" area for a short description of the app, call-to-action buttons, screenshots/videos presentation areas to show the users how the app looks like and what it can do, a "features" area to present product features, and more.

JAN 5 Continuation of Tuesday for pd 2,4 &6

JAN 6 PD 1,3,5

Jan 7 In this Photoshop assignment, I will teach you how to easily incorporate geometric elements and amazing light effects in your compositions. Using a ton of techniques, you will be able to discover how to create spectacular light effects and manipulate parts of your artwork to get interesting displacement effects.
