

Week of Sept 27

Monday - In the following lesson we are going to change the color of the garment with different types of retouching commands provided by Adobe Photoshop. These commands will take you to the advance photo retouching after proper practice. You need to select proper tool out of the available selection tools. Proper selection is the basic requirement for any photo retouching job where the precise selection is essential.

Tuesday - Overall color enhancement of the image is relatively easy as compared to specific part because you don't need to select the precise part of the image. Adobe photoshop provides the basic tools like brightness and contrast and many advanced tools and techniques that can be used in combinations. You must have the clear idea about what type and what degree of enhancement you need for your photograph.

Wed & Thu Sometimes you get the image with a pale background and the overall picture doesn't look as effective as it should be. Adobe Photoshop has the facility of blending mode that can be used to enhance the background. There are many methods to do the enhancement but here in this lessons, we have used color burn mode of the layer blending. You need to erase the portion of the image which you wish keep original and unchanged without colorburn.

Friday -.Burning luster lesson has the photograph darken and luster added to it. It is designed using Adobe Photoshop filters and layer blending modes. You can experiment with layer blending modes to get interesting effects. Try to use different filters and use layer blending modes in combination. Please make a note not to overdo it because you need lot of control over the input values of filters and image adjustment tools.
